Senior Full Stack Engineer (Frontend-Heavy) with over **5 years** of experience in building scalable, high-performance web applications for **fintech and enterprise** use cases. Expert in **frontend architecture** using **React, Next.js, and TypeScript**, with a proven track record of optimizing **performance-sensitive UIs** and reducing load times by **35%**. Highly proficient in designing secure **RESTful APIs** with **Node.js** and managing **relational databases** like **PostgreSQL** to ensure application reliability and data integrity

SKILLS

Performance: API Response Optimization, Server Side Caching, Database Schema Design

Backend: Node.js, Express.js, REST API Development, Asynchronous Programming

Database: PostgreSQL, MongoDB, Prisma ORM, SQL Queries, Joins, Indexing, Schema Design

Engineering Fundamentals: Data Structures & Algorithms, Object Oriented Programming, Rest API Design, SOLID Principles, HTTP Fundamentals, Git Workflow & Code Review, Debugging and Problem Solving

DevOps Tools: Docker, AWS (EC2, S3 – Basic), Git, GitHub Actions (CI/CD), JWT Authentication

Testing Tools: Vitest, Unit Testing, Integration Testing

EXPERIENCE

ADN Telecom Ltd.

Assistant Engineer **(11th December 2021 - 2022)**

Responsibilities:

- Spearheaded the end-to-end installation and configuration of IPPBX telecommunication systems.
- Provided expert-level troubleshooting and client support for enterprise-grade communication platforms.
- Successfully remediated 100+ critical VoIP service disruptions, optimizing call quality and network reliability.

MononSoft Ltd.

Software Engineer **(11th June 2022 - Present)**

Product: ERP Solution for NIPRO JMI PHARMA LTD.

Responsibilities:

- Developed and optimized 30+ frontend modules for ERP used by 200+ internal users
- Reduced page load time by 35% by optimizing API calls and implementing memoization
- Worked in Docker and Linux-based development environments
- Built reusable component libraries using React and TypeScript
- Translated Figma designs into responsive React components
- Implemented SSR and static generation using Next.js

PROJECTS

ECOMMERCE PROJECT

[Live Link](#)

[Client Repository](#)

[Server Repository](#)

Architected a full-stack e-commerce platform with role-based authentication and Stripe payment integration, handling dynamic product filtering and real-time order tracking. Implemented server-side rendering using Next.js for improved SEO and 40% faster initial load time.

KEY FEATURES

USED TECHNOLOGIES: Next JS, Node JS, Express JS, MongoDB, TypeScript

1. Product Rating System
2. Search and Filter functionalities
3. Add to Cart & Checkout System and Integrated Payment Gateway
4. Tracking order live in google map
5. CI/CD, Docker Integrated

YOUTUBE CLONE

[Live Link](#)

[Repository](#)

Designed a scalable video platform with Prisma ORM and PostgreSQL, implementing relational schema design and optimized queries for playlist and subscription management.

KEY FEATURES

USED TECHNOLOGIES: Next JS, Prisma, Postgresql, TypeScript

1. **Create studio** and upload video, set thumbnail
2. **Subscribe to channel**, like, dislike videos
3. **Create Playlist**, See History, Trending Videos

EDUCATION & LANGUAGE

NOAKHALI SCIENCE AND TECHNOLOGY UNIVERSITY
BSc in Information and Communication Engineering [2015-2019]

LANGUAGE: BANGLA (NATIVE), ENGLISH (FLUENT)
